

Brian Lockerbie

PROFESSIONAL SUMMARY

An organized, meticulous, recent Full Stack JavaScript graduate and Junior Full Stack Developer with experience in multiple languages uses creativity to solve problems and design beautiful web applications.

WORK HISTORY

Web developer (intern)

World of Toonz Enterprises

Toronto, ON/New York, NY

November 2020 – present

Assist in design and creation of websites using JavaScript and programs such as ReactJS. Responsible for the site's appearance and technical aspects, such as performance and capacity.

FULL STACK DEVELOPMENT EXPERIENCE

Full-Stack-APP with React and a REST API, Treehouse, April 2020

Created a full-stack application to allow users to administer a school-course information database. Possible database interactions included retrieving lists of courses, viewing details of specific courses, and creating, updating, & deleting courses from the database. **Exceeded Expectations.**

SQL-Library-Manager, Treehouse, February 2020

With HTML design and SQLite database provided, implemented a dynamic website using JavaScript, Node.js, Express, Pug & SQL. The application permits a user to create personalized lists to add, update or delete books from an SQLite database. **Exceeded Expectations.**

React Gallery Application, Treehouse, January 2020

With the React library, built an image gallery app using JSX to write markup-like syntax directly into JS files and manage state in.

Static Node.js and Express Site, Treehouse, December 2019

Created a portfolio site displaying the first five projects created at Treehouse. Includes landing page, About page and project pages with live demos. **Exceeded Expectations.**

OOP Game Show Application, Treehouse, September 2019

Created a phrase hunter game similar to the popular game 'hangman'. Used JavaScript, OOP, array iteration methods and CSS variables to allow users to guess letters within a phrase by clicking on them. Incorrect choices cost users a life; correct choices won the game. **Exceeded Expectations.**

SKILLS

- JavaScript
- ReactJS
- Asynchronous JS
- Node.js
- Express
- jQuery
- Angular
- Git & GitHub
- MySQL
- SQ Lite
- Sequelize
- Postman
- REST APIs
- React Context API
- Fetch API
- Flickr API
- Agile Methodology
- OOP
- PHP
- HTML
- CSS

CERTIFICATES

9 REACTS PROJECT COURSE

Udemy, October 2020

Cleaning up file structure; Npm packages including uuid; functional components.

BUILD APPS WITH REACTJS: THE COMPLETE COURSE

Udemy, September 2020

Build UI Components using ReactJS; JavaScript concepts underlying React; using backend technologies like Node and Express with React and professional web development with ReactJS.

GOOGLE ANALYTICS FOR BEGINNERS

Google Analytics Academy, June 2020

Make data-driven decisions; create and analyze reports.

EDUCATION

Treehouse Tech Degree
Full Stack Java Script, May 2020

George Brown College
BBA – Accounting (*in progress*)
